Because LodgeNetRX is provided by an interactive television leader with nearly two million rooms of hotel experience, existing relationships with leading studios and content providers are leveraged to provide your patients with premium Hollywood movies – many of them recently released box office hits! An exclusive relationship with Nintendo® for many of its most popular GameCube™ video games is also an unprecedented entertainment option for your patients. All of this world-class entertainment is available with the easy to use remote control device or pillow speaker and intuitive TV menus designed for a 5th grade education level. Your patients have probably used the remote and interactive TV system at a hotel when they traveled, so they are likely already familiar with this easy-to-use system!

LodgeNetRX also offers customized DIRECTV® channel packages and other healthcare centric channels to customize a channel lineup that meets your facility's unique needs. Plus, LodgeNetRX allows facilities to "channel map" their programming lineup with custom grouping or dedicated programming to specific channels – providing facilities with personalized lineups that meet their unique needs!

Along with entertainment channels, LodgeNetRX has a variety of informational channels for patients to choose from including the Welcome, Healthcare Information, Digital Healthcare Open and Information & Terms Channels. And if the healthcare facility chooses, patients can pay for entertainment services with a major credit card and system gift cards can be purchased in the healthcare facility gift shop.
