

LodgeNet | Broadband Control Solution

Guest room and conference services – with the power to make them your own.

LodgeNet Broadband Control takes our already comprehensive entry-level broadband solution and beefs it up with more back-office control. More customization. Automated reporting. And the flexibility to manage your guest room and conference services separately.

If your hotel needs a full-property broadband solution that's big on bottom-line benefits – and small on staff impact – this is the one for you.

FEATURES

- **Bandwidth Management** / Tiered bandwidth options for guest billing (may require 2-way PMS)
- **Security Management** / Firewall protection for guests, with engineered network solutions to protect their data
- **Conference Services** / Dedicated conference solution includes bandwidth allocation, conference codes, and IP address options
- **Guest Portal** / WYSIWYG page editor gives the hotel control over the look and feel of the guest facing first-up screen
- **Centralized Reporting** / Triggered push reporting delivers statistics on bandwidth utilization, uptime, usage, and call resolution

BENEFITS

- **Supports Greater Customization** / For advanced features like bandwidth management, tiered billing, and portal design
- **Includes Separate Conference Room Functionalities** / To accommodate the unique needs of individual guests and group users
- **Automates Reporting** / For the information you need, without taxing your staff
