

Bring Room Service Into The 21st Century...

With Envision™ and In-Room Dining, printed menus and room service calls are gone for good. Guests can browse items on menus you control – and place their order right through the TV. And the available point-of-sale (POS) integration option makes billing a breeze!

Real-Time Menu Management

The LodgeNet PowerPortal™ makes it fast and easy for authorized hotel staff to control the on-screen menus. Items can be added or deleted, and prices, descriptions and pictures can be changed any time with updates displaying immediately.

Choice of Billing Paths

- **E-Mail Notification & Manual Entry (Standard)** / The guest's order generates an e-mail to designated hotel staff, for manual entry into your POS system.
- **POS Integration (Available)** / The guest's order is automatically sent to your POS system and billed to his or her folio.*

In-Room Dining – adding convenience for your guests, efficiency for your staff and revenues to your bottom line. E-mail or call to learn more.

* POS integration requires the purchase of a transaction service module; Micros systems are supported today, with other POS vendors to follow.
