

LodgeNet Guestroom Manager

Today's **guests are traveling with multiple portable devices**, at least one of which is used for Internet access.

Accor / Ipsos survey, as reported to the HTNG In-Room Technology Workgroup, March 2009

82% of hotel guests said that **high-speed Internet access is the number one technology** that will make a difference on where they stayed.

Hotel Interactive, May 4 2009

The LodgeNet Guestroom Manager is a high-speed Internet access (HSIA) management gateway that provides hoteliers with control over security, reporting, bandwidth management, PMS integration and custom portal options – all in one affordable solution, with no additional or hidden fees after deployment.

BENEFITS

- Equips hotels to provide the reliable, high-speed Internet access (HSIA) experience their guests expect – for business or leisure.
- Empowers hoteliers to maximize the revenue potential of their guest room HSIA service.
- Imprints the hotel's brand identity onto the guest's HSIA experience.
- Enables the hotel to own all vital components of the connectivity experience including the "first-up" landing page, pricing and bandwidth allocation.

KEY FEATURES

- A robust, secure VBN (visitor based network) gateway:
 - User authentication
 - Splash pages
 - Billing interfaces (PMS or credit card)
 - Firewall protection
 - Access code administration
 - Usage reporting (including wireless session logging)
 - Network traffic monitoring
 - Per-user bandwidth management
- Connection agnostic: Supports ISDN, T1/T3, satellite, and wireless broadband.
- Widely deployable: Can be installed in properties at any stage – existing, renovations or new builds.
- Flexible maintenance plans: Various levels of support available from LodgeNet's industry leading, nationwide service organization.
