

Motorola PowerBroadband

The PowerBroadband system from Motorola is designed for enterprise hospitality and healthcare networks, and is useful in any high density MDU. It consists of a T3 PowerBroadband Switch combined with MC-802 (wireless & wired) and/or M2 (wired) WallPlates.

MC-802 WallPlate

A wireless solution that can be installed in the guest room where backhaul wiring is already located – saving up to 80% on installation costs

- Centrally managed through the Motorola T3 switch and intuitive WebUI
- Adaptive Line Power – operates over any single pair of telephone wire, concurrent and transparent with telephone service
- Easily installs with existing phone service
- Includes radio and RF mgmt firmware
- 1 x 802.11 b/g radio
- 2 x RJ45, 10/100 Mbps ports
- 1 x RJ11, line in port
- 1 x RJ11, filtered phone port

T3 PowerBroadband Switch

25-port switch or Digital Subscriber Line Access Multiplexer (DSLAM), used in conjunction with MC-802 and M2 WallPlates to provide a DSL wired and wireless HSIA solution

- Provides central management of both Motorola MC-802 (wireless & wired) and M2 (wired) WallPlates
- Switch management is integrated into the LodgeNet Proactive Monitoring Solution (LPMS)
- 2 x RJ45, 10/100/1000 Mbps uplink ports
- 2 x RJ21, female telco port
- 1 x db9, female console port

M2 WallPlate

Can be installed in conjunction with the MC-802 to provide additional wired access where required

- Centrally managed through the Motorola T3 switch and intuitive WebUI
- Adaptive Line Power – operates over any single pair of telephone wire, concurrent and transparent with telephone service
- Easily installs with existing phone service
- 2 x RJ45, 10/100 Mbps ports
- 1 x RJ11, line in port
- 1 x RJ11, filtered phone port
